

THE REGIONAL MUNICIPALITY OF WATERLOO  
COMMISSIONER OF PLANNING AND DEVELOPMENT

TO: Chairman Brian Turnbull and Members of the  
Planning and Development Committee

DATE: Tuesday October 18, 1988

SUBJECT: REPORT ON REGIONAL SUBDIVISION ACTIVITY, JUNE 30, 1988

RECOMMENDATION:

For Information

SUMMARY:

This report analyzes the availability of land for development in registered, draft approved and pending plans of subdivision as of June 30, 1988.

In summary, the number of units for residential development in registered plans has declined because of fewer units being registered and more building permits being issued.

REPORT:

Introduction

The purpose of this report is twofold, first it examines the available land supply for residential development in plans of subdivision. Second, the report reviews factors affecting the timing of the approval or registration of plans currently submitted.

It is expected that this information will be useful to Regional and Area Municipal Councils, Municipal Planning Staff and the Development Industry in examining the adequacy of the available residential land supply to meet short term needs.

The information in this report is based on the Region's Development Log which provides a detailed residential unit count for all registered, draft approved and pending plans and on local building permit information. Registered plan information is updated based on local building permit data. Building permit data has been received up to the end of June 1988 and the registered plan information is current to June 30, 1988. Pending plan and draft approved plan data is based on the Region's development application tracking system which is updated on an ongoing basis. Therefore, pending and draft approved plans are reviewed for the period ending September 1, 1988.

Analysis and Conclusion

Registered Plans

In the Regional Municipality of Waterloo the vacant land supply in registered plans for all types of residential units as of June 30, 1988 was 15,148 (Figure 1). This represents a decrease of 986 units from the December 31, 1987 total of 16,134. The trend over the last few years has been for moderate increases in the available supply despite the number of building permits being issued.

**FIGURE 1****Unbuilt Units in Registered Plans - June 30, 1988**

|                         | SF   | SD  | TH   | APT  | MIXED | TOTAL |
|-------------------------|------|-----|------|------|-------|-------|
| Kitchener               | 1046 | 56  | 911  | 7321 |       | 9334  |
| Cambridge               | 580  | 292 | 737  | 572  | 20    | 2201  |
| Waterloo                | 1223 | 94  | 1216 | 548  |       | 3081  |
| Township of Wilmot      | 329  |     |      |      |       | 329   |
| Township of Woolwich    | 196  |     |      |      |       | 196   |
| Township of Wellesley   | 161  |     |      |      |       | 161   |
| Township of N. Dumfries | 179  |     |      |      |       | 179   |
| REGION                  | 3714 | 442 | 2864 | 8441 | 20    | 15481 |

This decrease in the available supply occurred despite 7 plans being registered between January 1st and July 30, 1988, containing 271 units. Of the 7 plans that received registration, 3 were for non-residential uses such as commercial or industrial. As in previous years, the dominant type of unit being registered is single family/semi-detached, although one plan registered contained 81 townhouse units.

All municipalities except the Township of North Dumfries showed a decline in the availability of residential units for this time period. Two plans were registered in the Township of North Dumfries one of which was for residential purposes.

The number of registrations was not affected by any policy changes such as increases in the Regional Development Charge which has influenced the number of registrations in previous years. A record number of registrations occurred in 1987 (59 plans).

Using an average of 3500 building permits being issued annually, it would appear that there is an almost 4 1/2 year supply of residential units within registered plans. However, if building activity continued at the high rate experienced in 1987 (5482 units), the registered plan land supply could accommodate development for 2.8 years.

It should be recognized that of the unbuilt total number of units in the registered plans (15,481 units), there is a large majority of units contained in older plans (pre-1980) and for multiple units. The land containing these units has existed for some time and is not necessarily being built upon. As indicated in earlier reports, the low density developments (single family/semi-detached) have received the majority of building permits. Multiple developments which have occurred in or near the core areas for condominium developments usually occur on existing parcels of land not within subdivision plans and are not included in the development log inventory.

Building Permits

In the Regional Municipality of Waterloo for the period of January 1, 1988 to June 30, 1988, 3200 building permits were issued (Figure 2).

---

In an attempt to determine the availability of residential subdivision lands to be brought to the building stage, Regional staff have evaluated both draft approved and pending subdivision plans. The purpose of the evaluation was to identify those draft approved plans which have no major impediments and could be registered, and those draft approved plans which require either Official Plan or Secondary Plan changes or face significant development constraints. In addition, pending subdivision plans have been evaluated to determine which plans could proceed to draft approval in the near future and those that require Official Plan Amendments, Secondary Plan revisions or the submission of revised plans prior to their consideration for draft approval.

City of Kitchener

As of September 1, 1988 there are 6587 residential units in pending subdivision plans in the City of Kitchener. These can be separated into three categories; those that can proceed to draft approval and face no major limitations; those that require either an Official Plan Amendment, Secondary Plan revision, face a physical limitation to development or will be the subject of a revised subdivision submission prior to the plan proceeding to draft approval; and those recent subdivision submissions which are currently in circulation.

Plans containing 2907 residential units have been submitted since May 1988 and are still in circulation or Regional staff are pursuing the resolution of issues. The circulation of the remaining pending plans (containing 3680 units) has been completed and post-circulation comments have been forwarded to the City and the applicant.

Approximately 47% of the plans on which comments have been forwarded require either an Official Plan Amendment, Secondary Plan revision or face a significant physical limitation. One plan in the Laurentian West Community, for 1410 units, (Community Expansion Inc.) is currently the subject of an Official Plan Amendment for a neighbourhood commercial site. Plans in this area will also require the resolution of the Laurentian West drainage concern which requires the diversion of storm water drainage from the Voision Greenway to the Borden Greenway. Subdivision plans in the Hidden Valley area require the completion of the Secondary Plan, an Official Plan Amendment to Estate Residential and the provision of a second access.

Subdivision plans for Canada United Properties (457 units) in Country Hills East required the approval of Official Plan Amendment No. 79 dealing with the extension of Blockline Road and a Neighbourhood Commercial site. The Amendment has recently been approved and revised subdivision plans will be required to provide for the extension of Blockline Road.

Two subdivision plans totalling 77 units have been reviewed for estate residential development on municipal water and private septic systems in the Doon South Community. Subdivision development requires the extension of the municipal water line a distance of approximately three-quarters of a kilometre across intervening properties.

Revised subdivision plan submissions for a number of plans (totalling 989 units) are anticipated to address concerns identified in the circulation process.

No major concerns have been identified for plans containing 956 residential units and these plans could proceed to draft approval.

As of September 1, 1988, there are currently 1807 residential units in draft approved subdivision plans in the City of Kitchener. Of these units two-thirds (1163 units) face no major constraints to their development. The timing for bringing these units to the registration and building stage lies with the developer who is responsible for addressing the conditions of draft approval.

The remaining one-third of the draft approved units (644 units) are not expected to proceed to registration in the near future for a number of reasons. Most of these units are located in two subdivision plans in the Laurentian West Community. The Voisin subdivision (391 units) is currently the subject of a preliminary Official Plan Amendment to redesignate a significant portion of the property for commercial purposes. This Amendment was recently adopted by the City of Kitchener and Kitchener Council has recommended that draft approval be rescinded. In addition, there is a significant drainage concern within the Laurentian West Community which must be resolved prior to any major development occurring. The Coscan plan (253 units) requires the resolution of the Laurentian West drainage problem and the extension of services through the adjacent Voisin plan.

City of Waterloo

As of September 1, 1988, there were 27 pending plans of subdivision comprising 4202 residential units in the City of Waterloo. Of this total, the issuance of draft approval for approximately 80%, or 3338 units, is dependent upon either a resolution to the deferral of the Regional Official Policies Plan settlement boundary and Ira Needles Boulevard, an amendment to the City of Waterloo Official Plan and/or a modification to the applicable District Implementation Plan. The majority of these proposed plans of subdivision are located in the Beechwood West and Lexington Districts.

The remaining 11 plans of subdivision contain a total of 864 units. Five of these plans containing 353 units have just recently been received and are being reviewed by the various local and provincial agencies as part of the circulation process. Three plans (134 units) have either a staging, physical constraint or are being re-evaluated under a revised plan. The remaining 377 units on 3 plans appear to have no problems relating to the issuance of draft approval from the Regional perspective.

Draft approved plans in the City of Waterloo represent a total of 951 units in nine separate plans. Six of these plans (730 units) are proceeding to registration, while the remaining three plans (221 units) may be dependent on the staging of adjacent development for the provision of roads and sewer services.

City of Cambridge

Pending plans of subdivision (23) in the City of Cambridge have the potential of providing 6307 residential units, which is slightly less than the 6587 units in Kitchener, while significantly more than the 4202 pending units in the City of Waterloo. Of the 23 pending plans only three plans, the C.N.A. (golf course), B.L.I. Land Inc. and the Harry Hilborn plan, have been identified as requiring amendments to the City of Cambridge Official Plan. These three plans account for 1751 residential units.

North of Highway #401 along Townline Road there are three plans, Melran, Tyron and C.N.A., containing a total of 846 units that must await a joint drainage study and the extension of services south from Queen Street. The drainage study is required to address the concerns of Puslinch Township in accepting the expansion of urban development east to Townline Road.

Two proposed plans representing 156 units could be given draft approval but will not proceed to registration until adjacent plans have been developed, as these two plans require a second means of access or are land-locked.

An additional 380 residential units are being reconsidered under revised plans. These plans have been, or will be, revised to address local municipal or agency concerns or in the case of C&T Construction the plan was totally revised by the owner to reflect a new development strategy.

A total of 690 residential units in 5 new plans are currently in circulation.

While 26% of the pending units are dependent upon Official Plan Amendments and a further 22% are subject to revisions, additional studies, servicing, and staging concerns, there is no apparent problems with 40% of the total pending lots or 2,484 lots.

Three of these plans representing 1472 units have been pending since 1976-1979 and there is no indication as to when further action will be taken. The remaining units could be considered for draft approval once the City of Cambridge is satisfied.

There are 23 draft approved plans of subdivision in the City of Cambridge representing 2853 residential units. Two of these plans are being revised by the owner to reflect their own design and lot size preferences and are considered minor in nature. The revised plans represent 133 residential units.

The availability of sewer services in the Silver Heights area of the City will ultimately determine when registration of 5 plans or 425 residential units can proceed. The plans affected are the remainder of Alset Construction, Reemark Homes and all of Bagg & Houghton, Spot-Way Canada Wide Sales Inc. and H. DeGroot. It is anticipated that portions of these plans may be registered this year as the sewer line extends north.

Another limitation on the potential registration of plans in the City of Cambridge will be the sewage treatment capacity of the Galt and Hespeler Sewage Treatment Plants. All existing and future pending plans of subdivision in the Galt and Hespeler areas of Cambridge are evaluated under the Sewage Treatment Plant capacity criteria and the conditions of draft approval will contain a condition that the plan or any portion of a plan of subdivision not be released for registration until such time as there is such capacity in these plants to accommodate the additional residential units.

Of the remaining 2295 residential units on 16 draft approved plans, a significant portion appear to be progressing towards registration based on file activity, while four plans representing 164 units have been inactive for several years.

#### Township of Wilmot

As of September 1, 1988 there were 675 residential units in pending plans, of which 491 cannot proceed at this time pending the resolution of a servicing limitation in New Hamburg for those lands north of the CN rail line. The Township is finalizing plans and has received funding approval to undertake the necessary sewer improvements. These works will permit the lands north of the tracks to be brought to development. It should be noted that of the 491 units in pending plans in the affected area, one subdivision plan comprising 233 units lies almost entirely below the Regional floodline and could not proceed to develop until the floodplain issues are resolved.

As of September 1, 1988, there were 326 residential units in draft approved plans in the Township of Wilmot. However, an inactive mobile home development comprises 150 of these units. The remaining 176 residential units face no major impediments to registration and the timing for registration and development is primarily in the control of the developer.

In Baden 71 units have been draft approved since September 1, 1988 and this has committed entirely the remaining capacity in the Baden Sewage Treatment Plant.

Township of North Dumfries

Pending plans containing 211 residential units are under circulation in the Township. One plan containing 51 units proposes a settlement expansion in the Beverly area and will not proceed until the Beverly Study and the Official Plan Amendments are resolved. The second pending plan proposes 160 fully serviced units in Ayr and is also the subject of an Official Plan Amendment to expand the settlement boundary to include the lands. The Official Plan Amendment has not been approved.

There were 162 draft approved residential units in the Township as of September 1, 1988 and the majority of these units (135) are for fully serviced development within the Ayr Settlement. There are no major constraints facing any of these subdivision plans.

Township of Woolwich

Sewage Treatment Plant limitations pose a major problem and 366 residential units in pending plans in Elmira cannot proceed to development until this issue is resolved. There are an additional 324 residential units in pending plans in unserviced settlements. Of these, 190 units are contained in two recently submitted subdivision plans in Breslau. These plans may be impacted by the Ministry of Transportation of Ontario's plans for upgrading Highway No. 7. The Ministry is currently reviewing Highway No. 7 with a view to upgrading the existing alignment or possibly establishing a new alignment. These two subdivisions cannot proceed to development until the impact of Ministry of Transportation of Ontario's plans can be determined.

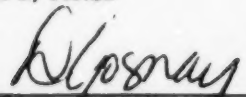

The 26 units contained in draft approved plans are located in unserviced settlements. One plan, containing 19 units, must resolve a drainage concern in Maryhill prior to proceeding.

Township of Wellesley

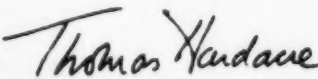

In the Township of Wellesley there are 3 pending plans of subdivision representing a potential of 129 additional residential units. An amendment to the Township Official Plan is required for two of these plans. While one is presently under review, an amendment for the other has not been formally considered. The remaining plan containing 65 units has been inactive for several years to the point that the Township has recommended that the file be closed due to lack of Sewage Treatment Plant capacity.

The lone draft approved plan containing 35 single family lots will be registered before the end of 1988.
